ANTS & CANOPY BOOTCAMP

JUNE 1-20 2020

Featuring:

- An introduction to ant systematics, identification and field-collection techniques
– on the ground and in the canopy
- A workshop including tree-climbing training, exercises and talks
- An expedition to the rainforests of Madagascar
- Hands-on field experience with local and international scientists

application deadline
DECEMBER 15th 2019

MADAGASCAR

All expenses covered!! This training for **US undergraduates** is offered as part of an NSF-funded project that investigates ant diversity patterns between different habitat types, elevation and vertical gradients across Madagascar.
